## **FOREWORD**

Japan has been an Applying Member of WAHO for over 20 years. It is now our real pleasure to publish the first Japanese Arabian Stud Book in English and become a full Registering Authority Member of the World Arabian Horse Organization (WAHO).

The Japan Association for International Racing and Stud Book (JAIRS) is responsible for the registration of Arabian Horses in Japan. All horses which appear in this volume are either born in Japan or imported, and registered with JAIRS based on the WAHO Definition below and as such they are internationally recognized as purebred Arabians.

As a matter of historical interest, records of Arabian horses which have been imported to and bred in Japan since the early 1900s are kept at the JAIRS office. Among those imports were 5 desert bred stallions from Syria, 2 stallions and 1 mare from Babolna in Hungary, 1 mare from Great Britain, 1 mare from Portugal, and 1 stallion from France. These early imports do not have descendants registered in this studbook and therefore they have not been included.

This studbook contains sections of Broodmares with their Produce and Stallions with their Progeny, which include their breeding records from 1980 until 2009.

All horses registered in this volume have been Blood or DNA typed, and all foals with sires and dams in Japan have been parent verified.

This Stud Book is basically compiled and will be maintained according to the Rules and Regulations of the WAHO. You may be aware that many foals born in Japan are unnamed at first registration. This is because in the past, Japan had no custom to name a foal at the time of Foal Registration, they are named at a later stage when they enter the breeding herd or for competition purposes, but now we fully understand the WAHO Rule about naming. We will make every effort to encourage breeders to name their foals as soon as possible.

### **THE WAHO DEFINITION FOR A PUREBRED ARABIAN HORSE:**

A purebred Arabian horse is one which appears in any purebred Arabian Stud Book or Register listed by WAHO as acceptable.

# CONDITIONS OF ENTRY TO THE JAPANESE ARABIAN STUD BOOK

## Article 1 PEDIGREE

1. A purebred Arabian horse is one which appears in any purebred Arabian horse stud book or Register listed by World Arabian Horse Organization (hereafter referred as "WAHO") as acceptable. To be eligible to be entered in the Japanese Arabian Stud Book issued by the Japan Association for International Racing and Stud Book (hereinafter referred to as "the JAIRS"), a horse must be the product of a mating between a sire and a dam, both of which are purebred Arabian horses described above.

## Article 2 REGISTRATION FOR BREEDING

1. No stallion or mare can be entered in the Japanese Arabian Stud Book, unless it is registered as breeding stock by the JAIRS. The owner of the animal to be registered as breeding stock must submit all the following documents accompanied by the registration fee to the JAIRS:
  - (1) A Certificate of Foal Registration issued by the JAIRS.  
In case of an imported breeding stock, an Export Certificate identifying the animal must be sent to the JAIRS directly from the Registering Authority Member of WAHO (hereafter referred as "WAHO Member") of the exporting country of the animal.
  - (2) An Application Form for Registration for Breeding signed and sealed by the owner of the animal describing the animal's name, sex, colour, date of birth, and pedigree.
2. Before it can be registered as breeding stock, the animal's identity must be established:
  - (1) By comparing the animal's markings with those recorded in the Certificate of Foal Registration, the Export Certificate, or the Passport. This should be practiced by officers and officials of the JAIRS or persons commissioned or appointed by the JAIRS (hereinafter referred to as "Registration Examiner").
  - (2) By establishing the DNA type and/or blood type of the animal. In respect of the animal, this may require the provision of a current sample taken by the Registration Examiner.
3. No animal may be registered as breeding stock retrospectively after it has died, except in the case that the DNA type and/or blood type of the animal has been officially established prior to the animal's death and the markings can be confirmed.

## Article 3 FOAL REGISTRATION

1. No foal born in Japan can be entered in the Japanese Arabian Stud Book, unless it is registered as a foal by the JAIRS. The owner of the foal to be registered must, in principle before weaning, submit all the following documents accompanied by the registration fee to the JAIRS:
  - (1) An Application Form for Foal Registration signed and sealed by the owner of the foal, describing the foal's sex, colour, date of birth, pedigree, place of birth, and the name of breeder.
  - (2) The dam's Certificate of Registration for Breeding, in the case that the dam has been registered as breeding stock by the JAIRS.  
In the case of imported horse, an Export Certificate issued by the WAHO Member of the exporting country must be sent to the JAIRS directly.
  - (3) An official Covering Certificate describing the dates of all coverings in the previous year as prescribed in section 4 of Article 9 of the Law for Improvement and Increased Production of Livestock (Law No. 209, 1950).  
For the produce of a mare covered abroad, a document certifying the fact of covering issued by the WAHO Member of the country where the dam thereof was covered, in lieu of the foregoing Covering Certificate.

2. The Registration Examiners must conduct the identification of the dam based on the markings recorded on the Certificate of Registration for Breeding presented by the owner, and examine the sex and colour of the foal, and record the markings. The sample must be taken from the foal, and where necessary, its sire and dam, for DNA typing and/or blood typing to verify its parentage.
3. A foal is not eligible for Foal Registration and cannot be entered in the Japanese Arabian Stud Book unless:
  - (1) It is the product of a natural service or covering which is the physical mounting of a mare by a stallion.  
AND
  - (2) A natural gestation took place in and delivery was from the body of the mare in which the foal was conceived.  
AND
  - (3) Sex is clearly recognizable.  
AND
  - (4) Parentage is verified by DNA typing and/or blood typing.  
AND
  - (5) Reported coat colour is consistent with the registered coat color of its stated parents.
4. Application for Foal Registration may be refused if the reported gestation period of its dam is significantly at variance with generally accepted limits.

#### **Article 4 OWNERSHIP**

The owner of the horse is deemed to be the person or entity whose name has been recorded as such in the Application for Foal Registration or for Registration for Breeding. It is stressed that ownership recorded in the Japanese Arabian Stud Book does not amount to legal registration of title to the horse and must not be construed as such.

#### **Article 5 BREEDER**

The breeder is the person or entity whose name has been recorded as being the owner of the mare at the time that her foal was dropped.

#### **Article 6 EXPORT**

Prior to exporting a horse registered by the JAIRS, the owner must submit the following documents accompanied by the appropriate fee to the JAIRS.

- (1) An Application Form for Export Certificate and Passport.
- (2) A Certificate of Foal Registration or a Certificate of Registration for Breeding.
- (3) In the case of exporting a broodmare in-foal, the Covering Certificate is also required.

#### **Article 7 IDENTITY DOCUMENTS**

- (1) A Certificate of Registration for Breeding shall be issued to the owner of the animal registered as a breeding stock by the JAIRS.
- (2) A Certificate of Foal Registration shall be issued to the owner of the horse registered as a foal by the JAIRS.
- (3) When exporting a horse registered by the JAIRS, an Export Certificate and a Passport shall be issued. The Export Certificate must be sent directly to the WAHO Member of the importing country, and the Passport shall be issued to the owner of the horse.

## **Article 8 REPORT FROM OWNERS**

1. If any stallion or broodmare already registered as breeding stock falls within one of the following categories, its owner must notify the JAIRS of the change in circumstances in writing within 30 days.
  - (1) In the event of a change of ownership resulting from sale, donation, inheritance, and etc. (both the previous and new owners in the case of a domestic change of ownership).
  - (2) In the event of death or alteration of use.
  - (3) In the event of exportation or importation.
2. The Return of Mare Form is distributed to every mare owner each season. It must be completed and returned to the JAIRS not later than 31st May of the foaling year, describing:
  - (1) Covering stallion, foal's sex, colour, date of birth, and place of birth. If a mare is covered by more than one stallion, a separate entry must be made for each stallion.
  - (2) In the event of no live produce the official Return must still be completed indicating whether the mare was barren, slipped, or not covered in the previous year, or that foal was dead at birth or died since birth.
3. A book of Covering Records is distributed to every stallion owner each season. It must be completed and returned to the JAIRS not later than 30th September in the year of covering. Stallion owner is also requested to describe the details of covering records of every mare covered by the stallion in the season.

## **Article 9 DNA TYPING/BLOOD TYPING**

1. DNA typing and/or blood typing must be carried out by the laboratory designated by the JAIRS (hereinafter referred to as "the Laboratory") in accordance with the requirement of the International Society for Animal Genetics.
2. For the purpose of these Conditions of Entry, an horse's DNA type and/or blood type will not be considered to be officially established unless either it has been established by the Laboratory based on a sample submitted to the Laboratory, and notified to the JAIRS, or, in certain circumstances, it has been established by the laboratory designated by the WAHO Member overseas, and notified to the JAIRS. The circumstances under which DNA types and/or blood types established by overseas laboratories as above will be accepted are:
  - (1) In exceptional cases, and only if the animal concerned has died before a valid sample could reasonably have been taken from it, to establish the DNA type and/or blood type of an imported broodmare or stallion.
  - (2) In the case of stallions only, for the purpose of parentage testing a foal conceived abroad and imported in utero.

## List of WAHO ISO Country Codes and Stud Book Codes Used in this Volume

Country	Code	Stud Book
Australia	AU	AHSA
Egypt	EG	EAO
France	FR	SBFAR
Germany	DE	GASB
Hungary	HU	ASBB
Japan	JP	JASB
Oman	OM	OMAN
Poland	PL	PASB
Portugal	PT	PSB
Russia	RU	RASB
Spain	ES	SSB
Sweden	SE	SESB
United Arab Emirates	AE	UAE
United Kingdom	GB	AHSB
United States of America	US	AHA/PAHR

Note: For United States of America, AHR is used to the end of 1997, and from the start of 2008. PAHR is used from the start of 1998 to the end of 2007.
